

SOFTWARE ENGINEER

Red Lion Controls is an international manufacturer of industrial electronic equipment. We are currently seeking a highly motivated Software Engineer to join our operator interface and communications development team. Join our software development team and you will apply your talents to a leader in industrial automation.

The ideal candidate has 8 years of experience in software development, with a mixture of both embedded and Windows SDK programming being preferable. Candidates must be fluent in C++ and show a good understanding of applying the language in a bare-metal environment. C# experience is a plus. Experience of TCP/IP communications, graphics algorithms, and multi-threaded programming would be an advantage. Excellent written language skills are a must.

We offer a competitive salary, an excellent benefits package and an exciting career opportunity. ***Qualified candidates should send a resume in confidence with details of salary history to softwareengineer@redlion.net***
