

SOFTWARE TEST ENGINEER

Red Lion Controls is an international manufacturer of industrial electronic equipment. We have an immediate opening for a Software Test Engineer in our York facility to join our operator interface and communications development team. Join our software development team and you will apply your talents to a leader in industrial automation.

The ideal candidate has 5 years of experience in software test design and testing. Experience testing software on the Windows platform as well as testing embedded software is preferable. The successful candidate should have experience with Microsoft SourceSafe or Team Foundation Server and have a basic familiarity with the C++ language. Test automation experience would be a plus.

This challenging opportunity requires a self-directed, dynamic and highly-motivated individual. The ability to work diligently and follow software lifecycle procedures, including defect tracking, is vital. Good written English would be a distinct advantage.

We offer a competitive salary, an excellent benefits package and an exciting career opportunity. ***Qualified candidates should send a resume in confidence with details of salary history to softwaretestengineer@redlion.net***
