Product Upgrade

June 15, 2015

Red Lion Controls is committed to providing advanced industrial cellular hardware, and we are therefore pleased to announce that our current Sixnet® series 4G LTE IndustrialPro® SN 6700, RAM® 6700 and RAM 9700 cellular RTU devices will soon be upgraded to 4G LTE IndustrialPro SN 6900, RAM 6900 and RAM 9900 models.

These new models are designed to provide our customers with additional valuable features and functionality, including multi-carrier support, which helps reduce inventory by allowing customers to pick the most appropriate carrier for the region. RAM cellular RTUs are further enhanced with the addition of GPS, allowing customers to accurately locate equipment and assets. Other functionality remains the same to provide customers with an easy product migration.

With an intuitive web-based user interface, the same hardware can now be configured so that the cellular radio can operate on different supported cellular carriers. At this time we are offering units defaulted to Verizon Wireless, AT&T or Generic (Canadian Carriers) – all of which can be changed by the user.

After June 30, 2015 we will only take orders for the 6700 and 9700 models until parts are no longer available. We will continue to provide technical support and honor product warranties. Repair services will be provided for as long as components remain available.

Customer Migration Path

Part Numbers Affected	Replacement Part Numbers	Notes
SN-6700-XX	SN-6900-VZ, -AT, or -AM	XX denotes the default carrier. (VZ for Verizon or AT for AT&T in US) (AM for all Canadian carriers - Bell Mobility, TELUS, Rogers, SaskTel, or MTS in Canada)
SN-6701-XX	SN-6901-VZ, -AT, or -AM	
SN-6701EB-XX	SN-6901EB-VZ, -AT, or -AM	
SN-6721-XX	SN-6921-VZ, -AT, or -AM	
RAM-6700-XX	RAM-6900-VZ, -AT, or -AM	XX denotes the default carrier. (VZ for Verizon or AT for AT&T in US) (AM for all Canadian carriers - Bell Mobility, TELUS, Rogers, SaskTel, or MTS in Canada)
RAM-6701-XX	RAM-6901-VZ, -AT, or -AM	
RAM-6701EB-XX	RAM-6901EB-VZ, -AT, or -AM	
RAM-6721-XX	RAM-6921-VZ, -AT, or -AM	

RAM-9701-XX	RAM-9911-VZ, -AT, or -AM	XX denotes the default carrier. (VZ for Verizon or AT for AT&T in US)
RAM-9711-XX	RAM-9911-VZ, -AT, or -AM	(AM for all Canadian carriers – Bell Mobility, TELUS, Rogers, SaskTel, MTS in Canada)
RAM-9731-XX	RAM-9931-VZ, -AT, or -AM
