

Product Upgrade

June 30, 2015

As cellular carriers and the marketplace continue to migrate away from 2G cellular networks, Red Lion Controls announces the obsolescence of the G3GSM and XCGSM cellular modules, which affect Red Lion's G3 HMI, Data Station Plus, Modular Controller and ProducTVity Station products. Red Lion will continue to offer the legacy G3GSM and XCGSM products for as long as our limited supply of components remains available.

Red Lion encourages customers to upgrade to G3HSPA or XCHSPA modules to ensure uninterrupted service. These new modules leverage advanced HSPA+ cellular technology, which provides a faster more reliable cellular connection. All other functionality remains the same to provide customers with an easy product migration. GSM modules will continue to work until cellular carriers begin removing these legacy networks.

Customer Migration Path

Part Numbers Affected	Replacement Part Numbers	Compatible Products
G3GSM000	G3HSPA00	G3 HMI
XCGSM000	XCHSPA00	Data Station Plus Modular Controller ProducTVity Station

For more information on these modules or compatible products, please see the following:
