

SLX-8MG Industrial Ethernet Switch

Sixnet® Networking Series

Managed Gigabit Ethernet Switch

Red Lion's Sixnet® series SLX-8MG managed Gigabit Ethernet switch features eight ports with four SFP combination ports and Modbus monitoring, providing reliable connectivity options in harsh environments.

The rugged SLX-8MG managed switch features eight 10/100/1000Base-T(X) ports with four SFP combo ports (supporting 100Base or 1000Base fiber transceivers). Designed to handle harsh environments, the SLX-8MG is housed in a slim, hardened metal DIN-rail enclosure, supports redundant 10-30 VDC power inputs, and offers wire-speed throughput, high MTBF and a wide -40° to 75°C operating temperature range. Real-Time Ring, self-healing ring technology, Modbus/TCP remote monitoring and advanced security features ensure reliable and secure operation in industrial applications.

* Use this special singlemode transceiver with multimode fiber cable for a nominal maximum link distance of 2km. This transceiver offsets the transmitted light (so no mode conditioning patch cord is required) and is specifically for use with multimode fiber cable. It is recommended that this transceiver be used on both ends of the cable for best performance. Do not use this transceiver with singlemode fiber cable.
