

MORE IIoT

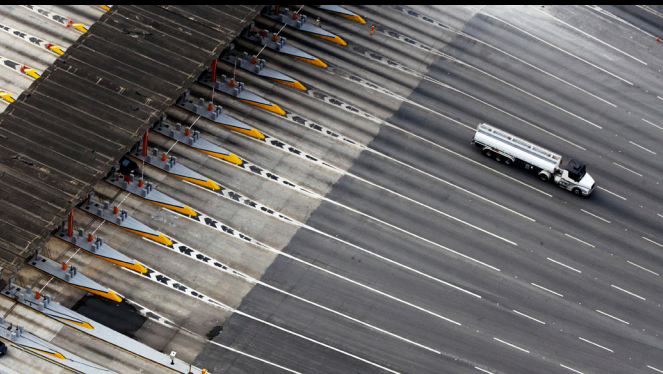

Data. Processes. Devices. Locations.

Red Lion has been connecting devices and moving data for years, enabling customers to easily advance to the Industrial Internet of Things (IIoT). Our IIoT-ready industrial automation and networking products:

- **Connect:** Extend equipment lifespan with protocol conversion
- **Monitor:** Improve process visibility with visual management
- **Control:** Push control to the edge with remote monitoring
- **Network:** Expand network reliability with industrial Ethernet

Get IIoT-Ready with Red Lion Products

IIoT implementation is driven by the need for smarter, more interconnected operations. To achieve this, organizations require easy-to-use solutions to connect and expand the capabilities of legacy equipment within existing facilities. This is why Red Lion provides IIoT-ready solutions that leverage protocol conversion, visual management, remote monitoring and industrial Ethernet technologies to help customers do MORE. In fact, customers around the world have been using our award-winning industrial automation and networking products for over forty years to connect, monitor, control and network operations.

Visit www.redlion.net/moreIIoT or email info@redlion.net to learn MORE today.

Connect MORE:

Use protocol conversion to extend equipment lifespan with Graphite® HMIs and Data Station Plus.

- Enable communication between 300+ industrial protocols
- Support a variety of physical interface media: serial, Ethernet, USB
- Leverage built-in web server for remote monitoring
- Send alarms and log real-time data directly to CSV file

Monitor MORE:

Improve process visibility with visual management driven by the ProductTVity Station.

- Turn any TV into a graphical KPI, OEE and Andon display
- Enable communication between 300+ industrial protocols
- Leverage built-in web server for remote monitoring
- Support a variety of physical interface media: serial, Ethernet, USB

Control MORE:

Push control to the edge with remote monitoring enabled by RAM® cellular RTUs.

- Trigger I/O or send SMS text alerts based on real-time data
- Address harsh environment conditions with rugged, secure platform
- Support varied connectivity options from I/O to serial, Ethernet and Wi-Fi
- Use security features to ensure data is protected

Network MORE:

Expand network reliability with industrial Ethernet powered by NT24k® switches.

- Over 100 mixed-media configuration options: Fast Ethernet, Gigabit, Copper, Fiber, SFP, PoE+
- Withstand extreme conditions with rugged environmental specs
- Enable plug-and-play deployment thanks to auto-configuration
- Built-in N-Ring™ technology provides 30ms network healing time
