IIoT Advantage: Visual Management for Process Visibility

Red Lion's ProductVity Station is a ready-to-deploy system that gathers data to drive plant-floor performance and improve process visibility in days, not months.

- Display real-time KPI data and Andon messages on any television
- Enable communication between 300+ industrial protocols
- Support a variety of physical interface media from serial to Ethernet and USB

ProducTVity Station Improves Process Visibility

To ensure successful Industrial Internet of Things (IIoT) implementations, visual management is essential for process visibility. This is why Red Lion's ProducTVity Station displays real-time Key Performance Indicator (KPI) data and Andon messages on large televisions to provide insight that enables customers to do MORE. As a ready-to-deploy visual management system, the ProducTVity Station is ideal for factory floors, processing plants or any place where performance tracking and process visibility can help drive productivity.

Features & Benefits

Performance tracking and process visibility

- Create hi-definition KPI and Andon message boards
- Supports HDTVs with DVI or HDMI interfaces
- Easily duplicate data on multiple TVs
- Display alerts and equipment status based on predefined parameters

Protocol conversion connects virtually any device

- Support for over 300 industrial protocols
- Convert multiple protocols simultaneously
- Quickly map data to PLCs, PCs and SCADA systems

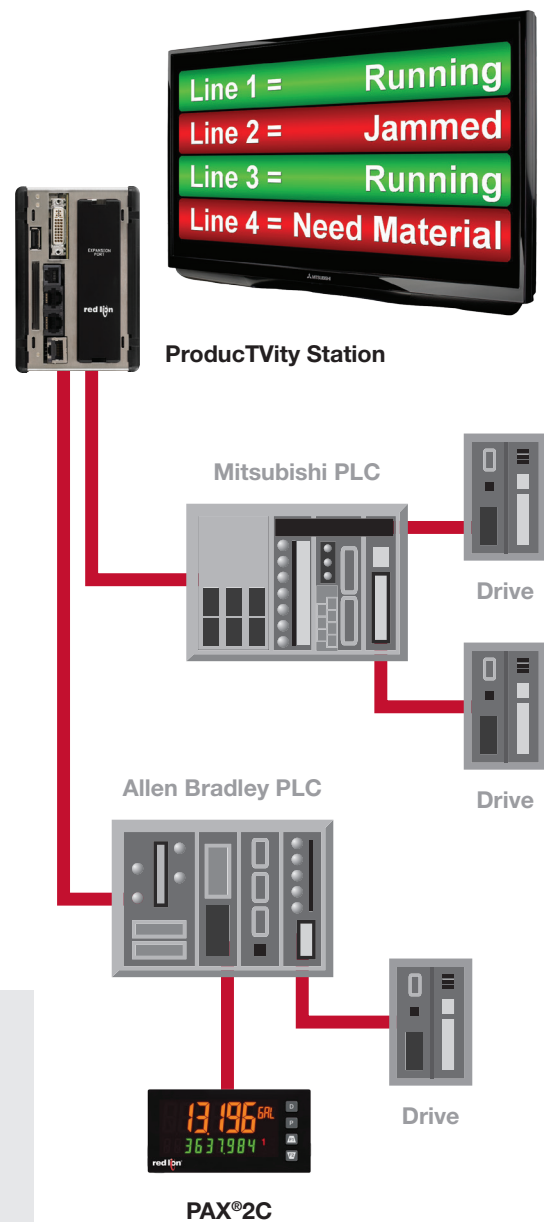

Collect, calculate and display data with ease

- Easy configuration via flagship Crimson® 3.0 software
- Leverage built-in graphic library of over 5,000 drag-and-drop elements
- Quickly synchronize with FTP and MS SQL servers
- Calculate complex and time-based metrics
- Track and log data directly to CSV files via USB and CompactFlash® ports

Remote monitoring and control capabilities

- Gain remote insight via built-in web server
- Receive text and email notifications via mail manager
- Send report or log data files as attachments

Visit www.redlion.net/VisualManagement or email info@redlion.net to monitor MORE today.

Crimson 3.0 Software

- Easily establish communication between connected devices using extensive library of over 300 industrial protocols
- Quickly enable data logging, protocol conversion, web serving and remote access
- Rapidly build graphic interfaces with comprehensive image library of over 5,000 industrial graphics
