Product End of Life Notice

TMPT Temperature Transmitters to DIN Rail Solution

Introduction

Red Lion added the TMPT temperature transmitters as a natural complement to our offering of temperature sensors. Commonly temperature transmitters are used to extend cable runs for thermocouple or RTD sensors. The transmitter output can travel much further through more unstable environments than the thermocouples and RTD sensor outputs can without assistance.

This document explains the reason for the product EOL and provides details about the timing involved. In addition, we describe alternative product that is available and information on how its features compare.

Timing

Red Lion Controls intends to honor the standard warranty obligation for this product when ordered and delivered in accordance with the following transition schedule:
